My Nonhuman Friends (2021) [[edit](#)]

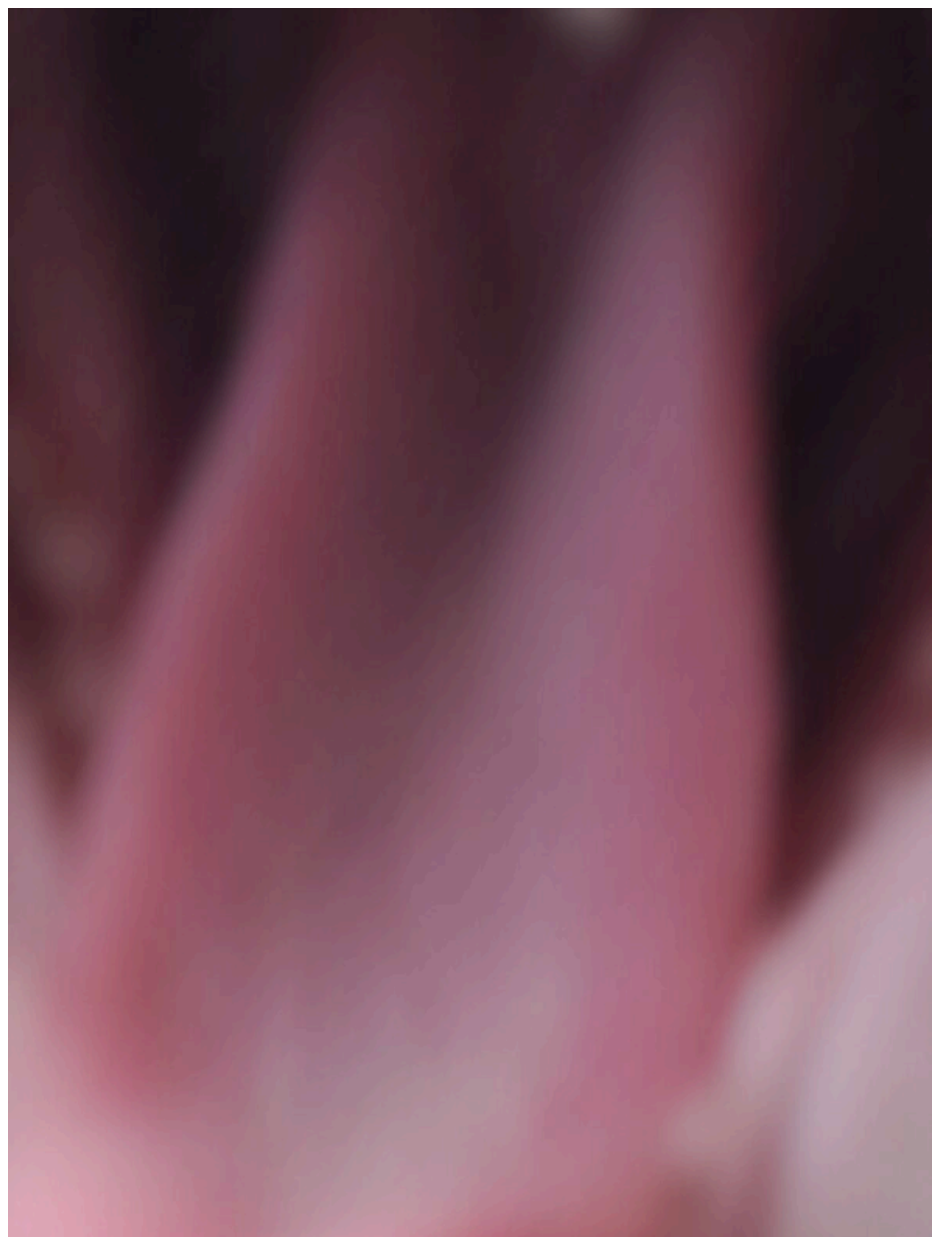

My Nonhuman Friends is a photographic project by [Nika Sandler](#) (2021).

Since birth, I have always been surrounded by cats. The first being who became interested in me after I was discharged from the hospital was a cat. He stood on the bed and stared at me. He had never seen a human child before. Fortunately, he liked me. I had been under his watchful eye ever since. At the same time, my friendship with cats began.

A year ago, I lost a close feline friend. This event made me immerse myself in the memories of cats and reflect on their impact on me and my life.

In this series, I turn to archival photographs of my nonhuman friends, some of which I magnify greatly and try to look at and recall the smallest details in a catlike, far-sighted way. I create still lifes with objects that remember the touches and smell of my friends. I also take screenshots of camera footage attached to cats' collars to get an idea of how they saw the world.

Plant and Human Pain (2022) [edit]

Plant and Human Pain is a photographic project by [Nika Sandler](#) (2022).

I think, like modern biologists, that plants feel pain. They found out that plants secrete substances that suppress it and react to anesthetics like animals and people.

In my works, I show plants unconventionally beautiful: painful, dying, dead. I compare the external manifestations of their illnesses and deaths with the bodily suffering and dying of people. Thus, I try to find common ground between the tragic side of plant and human existence.

The Black Sun (2022) [\[edit\]](#)

In "The Black Sun of Autocracy", I travel to autocratic countries* using Google Street View. I find and capture digital artifacts that remind me of the essence of this regime. The protagonist of this series is the black circle, aka the black sun that shone over these countries.

In "The Romance of the Fungus World", researchers Rolfe write that in literature, folklore and science, fungus are often associated with pestilence, death and decay, and their physicality appears creepy and repulsive. In this series, I move away from the mycophobic images of fungoid entities in terms of conventional ideas and show their ability to be creative and hospitable. I depict fungus as being like unearthly creatures, as in myths and theories about their cosmic origin.

A 4x2 grid of 8 images showcasing various fungi and mushrooms. The top row features a close-up of a textured, light-colored fungus on the left and a cluster of pale, gilled mushrooms on the right. The second row shows a dense growth of small, red, cup-shaped fungi on the left and a close-up of a pink, gilled mushroom on the right. The third row displays a single, large, purple-capped mushroom with white gills on the left and a close-up of a dark, textured, possibly bracket fungus on the right. The fourth row includes a cluster of small, light-brown mushrooms on the left and a close-up of a dark, textured surface, likely a mushroom cap, on the right. The bottom row shows four smooth, brown, egg-shaped fungi on a rock on the left and a close-up of a dark, hairy fungus on the right. The final row is a vertical strip showing a blue, textured surface with small, light-colored, irregular patches.

A History of Teeth (2023) [edit]

A History of Teeth is a photographic project by [Nika Sandler](#) (2023)

In this work I explore teeth as a record of human experience. I delve into the sensual and emotional world they reveal. I also try to look beyond human perception by studying plaque bacteria and machine vision.

The Ancient Depths (2024) [\[edit\]](#)

The Ancient Depths is an AI project created by [Nika Sandler](#) and Stable Diffusion (2024).

In light of the increasingly concerning news about the imminent fate of the oceans, I find myself contemplating the issue of extinction with greater frequency. In collaboration with artificial intelligence, I dive into ancient waters and capture the inhabitants whose existence was interrupted and whose evidence is preserved in fossils. The aim of this work is to illustrate the fragility of life and to prompt reflection on the current, rapid extinction in which humanity plays a pivotal role.
